

*Leukoplast® -
the professionals'
choice*

With focused dedication in wound care and continued commitment to excellence and service Leukoplast® has benefitted our customers for over 100 years in Europe. Now in the US market we will launch the Leukoplast® brand, which will be marketed under the umbrella of the Hypafix® product line.

Leukoplast® Hypafix®
covering all fixation needs

Leukoplast®

Wound care in best hands

Trusted performance with Leukoplast® Hypafix®

When it comes to medical products, quality is the top priority. The Hypafix® range of wide-area fixation products is your trusted partner when reliable adhesion is required. Flexible in use and easy to apply.

The features:

- Fast fixation on different wound sizes and also on moving body areas
- Flexible adaptation for patient comfort
- Reliable adhesion
- Highly breathable materials to prevent skin maceration and to help the wound to heal
- Helps to prevent contamination
- Residual-free removal
- Radio-transparent
- Not made with natural rubber latex

Our top-seller in wide-area fixation

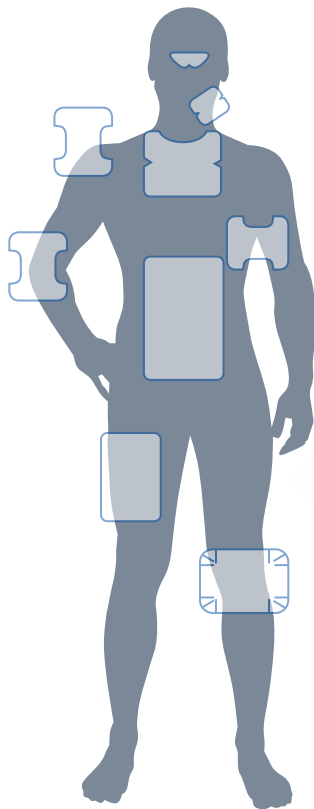

Leukoplast® Hypafix®

For wide-area fixation on frequently moved and highly contoured body parts

This highly conformable, very soft and breathable wide-area fixation was designed by our experts to comfortably secure wound pads and ointment dressings, as well as instruments, probes, catheters and measuring devices, especially on frequently moved and highly contoured parts of the body.

Stretchable: made for moving body parts

- Non-woven fabric
- Resistant to tearing and pulling

High wearing comfort

- Soft material
- Stretches with movement

Breathable

- Air- and moisture-permeable

Low-allergy

- Suitable for patients with sensitive skin
- Not made with natural rubber latex

Easy application

- Made for contoured body parts

Leukoplast® Hypafix® transparent

For waterproof wide-area fixation of wound dressings

This skin-friendly, ultra thin PU film was developed by our experts to protect reliably against water as well as bacteria and other contaminants.

Waterproof and almost invisible

- Ultra-thin PU film
- Protects reliably against water
- Allows bathing and hydrotherapy

Flexible adaptation to body contours

- Very thin, soft and flexible

Quick and easy application

- Intuitive application technique with distinctive red stripe

Excellent wearing comfort

- skin friendly yet strong adhesive

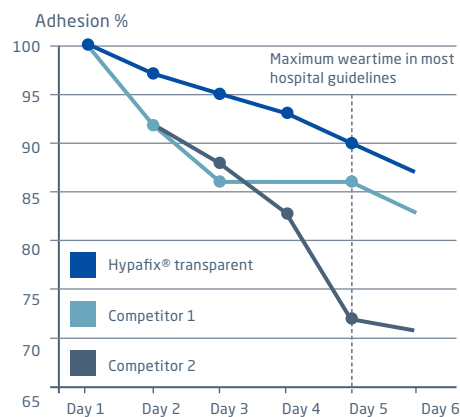

Supports infection prevention

- Protects against bacteria and contaminants

Breathable

Long-lasting adhesion**

- Better adhesion than competitors and lasts longer

Leukoplast® Hypafix® skin sensitive

For secure fixation and reliable adhesion on fragile or compromised skin

Leukoplast® has expanded its range to include Hypafix® skin sensitive, which is designed especially for use on patients with fragile or compromised skin. The soft silicone adhesive helps to protect against adhesive-related injuries.

Protects fragile skin

- Reliable adhesion with minimal impact on skin

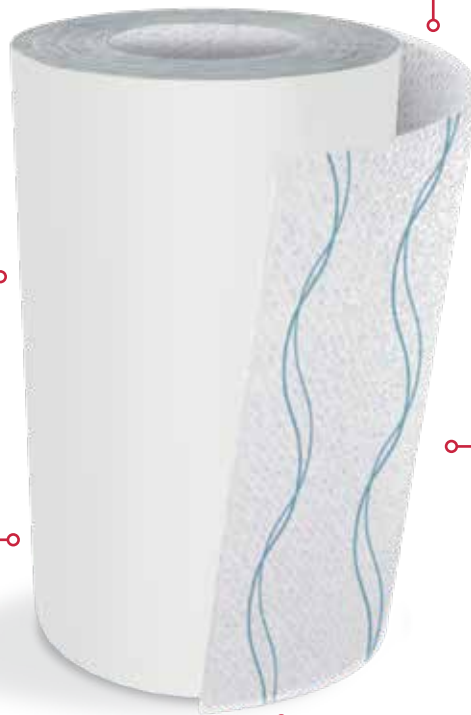

High wearing comfort

Atraumatic removal

- easy to use and re-position

Extra gentle

- >94% of users confirmed their skin did not react at all*

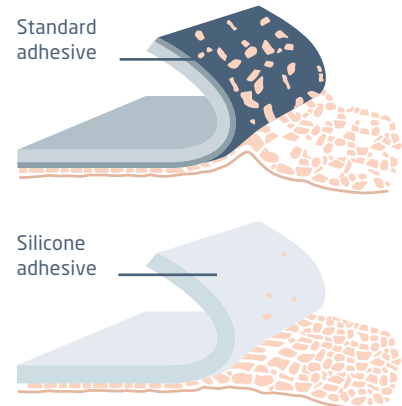

Easy application

- Can be repositioned multiple times
- Can be separated if stuck together
- Residual-free removal

Skin-friendly silicone adhesive

Minimal impact on skin integrity
