

Advanced Digital Wound Management

Connectivity, Intelligence, and Insight

From 3D imaging to system-wide deployment of mobile wound care solutions, eKare delivers the industry's most advanced digital wound management platform.

eKare inSight® combines the latest in computer vision systems, machine learning, and a deep understanding of clinical workflow to provide an optimized solution for wound management across the healthcare continuum. The inSight® platform allows for evidence-based practice through a cloud-based deployment that improves care coordination and patient-centered care.

*eKare inSight is indicated for wound measurement and documentation and can be used on all external wound types.

How does eKare inSight improve Wound Care?

- Analyze 3D wound dimensions and visual classification in real-time
- Optimize workflow and automate documentation with EHR integration
- Promote better clinical decisions with real-time data and analytics
- Ensure compliance and mitigate risk with streamlined documentation and reporting
- Improve care coordination and remote monitoring with a HIPAA-compliant cloud database

Clinically Validated Precision & Consistency*

Developed by world-class experts in computer vision, eKare insight® delivers exceptional performance in wound measurement accuracy and reliability.

Perform and document wound measurement in less than 10 seconds

Point-and-shoot, no reference marker required

> 95% accuracy with 1mm resolution

0.99 Inter/Intra-rater reliability (ICC)

*Based on independent validation studies. Figures not specifically cleared by the FDA.

Workflow Optimization

Streamline wound assessment and documentation with a single image capture. Eliminate redundancy by automatically syncing data to a secure cloud for easy archiving and access.

- Significant RN time savings
- Automated wound documentation and reporting
- Streamlined survey preparation
- Site-specific and corporate-wide reporting

Data Security & Privacy

Store and access data with peace of mind. The inSight® platform is fully HIPAA-compliant with built-in measures for privacy, data encryption, and security. No clinical information is stored on the mobile device. All data collected on the app is removed from the device immediately upon syncing to the secure eKare cloud.

Testimonial

"What inSight is capable of is unprecedented. It transformed how we deliver wound care for better quality and higher efficiency."

- Alex Solovey, CEO, Cassena Care

EHR Integration and Seamless Data Access

The inSight® wound management platform is equipped with APIs to handle seamless integrations with all major EHRs, including Epic and Cerner. Our integration engine supports both the industry-standard HL7 protocol and the latest FHIR standard as seen in Epic's App Orchard and Cerner Code programs.
