Suprasorb® P sensitive Ag **NEW**

Gentle, versatile, protective
foam dressing with silver.

Suprasorb® P sensitive Ag **NEW**

Gentle, versatile, protective foam dressing with silver.

Suprasorb® P sensitive Ag is an absorbent foam dressing with antibacterial silver.

The new Suprasorb® P sensitive Ag foam dressing with antibacterial silver works with you and your patient to support your wound bed preparation, protecting against bacterial (biofilm) contamination, extending wear time and preventing medical adhesive related skin injury.

Indications

Suprasorb P sensitive Ag dressings are indicated for the management of moderate- to highly-exuding¹ acute or chronic wounds⁸, including:

- Venous leg ulcers
- Diabetic foot ulcers
- Pressure injuries
- Dehisced surgical wounds
- Graft donor and recipient sites
- Skin tears and abrasions

Key Benefits

Ionic Silver **extends wear time** by reducing bacterial (biofilm) colonization⁴

Prevents biofilm colonization for up to 7 days⁵

Dressing can remain on the wound site up to **7 days**⁵

Waterproof and **bacteria-proof** while allowing water vapor to escape⁵

Protective backing provides low coefficient of friction surface⁵

Can be worn **in the shower**⁵

Gentle yet secure silicone adhesive technology **minimizes patient pain** and trauma to the wound and skin during dressing changes^{1,6}

Suprasorb® P sensitive Ag **NEW**

Takes on the tough challenges of wound care.

Protection

- Protects from external moisture and microbial contamination
- Protects skin from medical adhesive-related skin injury
- Protects against biofilm buildup in the dressing to extend wear time

Efficient exudate management^{1,2}

- promotes quick absorption of exudate into the dressing
- maintains moist environment³

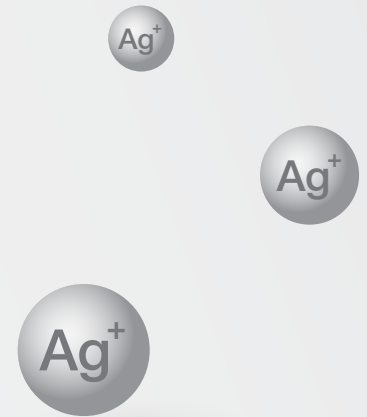

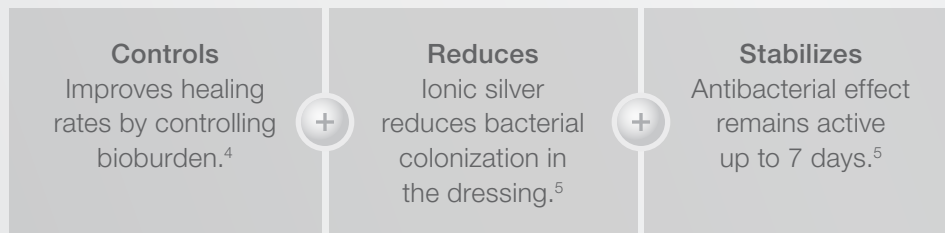

Softness & comfort³

- Gentle yet secure adhesion
 - Atraumatic — Pain-free removal
 - Reliable seal at the wound edge to protect skin
 - Extensible, flexible film and foam move with the patient for security and comfort.
- 

Suprasorb[®] P sensitive Ag **NEW**

The silver lining for sensitive wounds.

Suprasorb P sensitive Ag dressings with ionic silver provide you with the right combination of a moist wound environment¹ while managing moderate to highly exuding¹ wounds delivering effective antibacterial action to inhibit biofilm reconstruction.⁵

Suprasorb[®] P sensitive Ag

Five layers dedicated to wound healing.

Protective backing

- high moisture vapor transmission rate (MVTR)¹
- smooth and conformable³ with low coefficient of friction
- waterproof
- microbial barrier

Suprasorb P sensitive Ag border with super-absorbent core

- super-absorbent polymer fibers
- traps fluid under compression
- extends wear time and reduces risk of maceration²

Non-woven layer

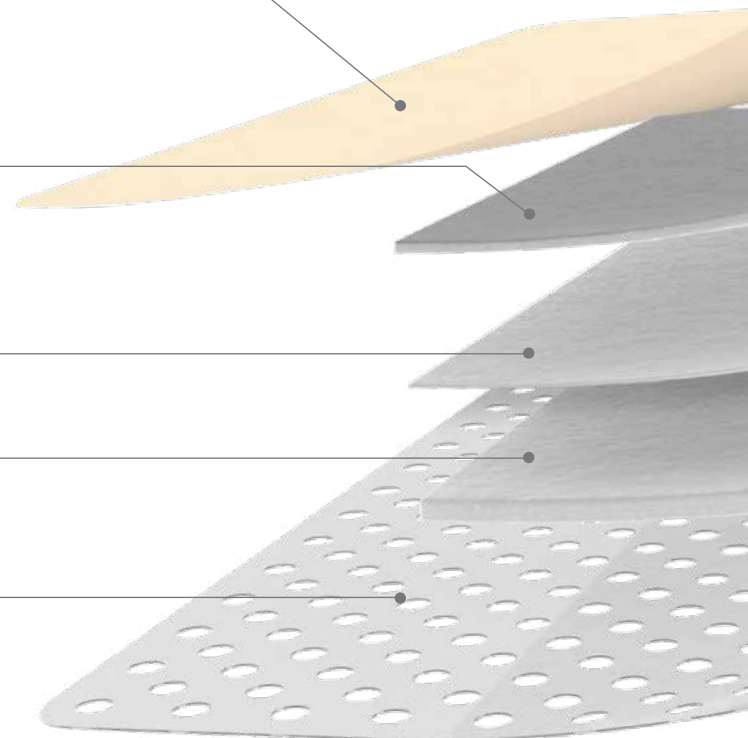

- helps to distribute exudate

Absorbent polyurethane foam

- offers comfort and cushioning⁷
- efficient exudate management^{1,2}

OptiSil silicone wound contact layer

- perforations for swift exudate transfer
- soft and pliable for maximum patient comfort
- atraumatic release minimizes pain during dressing removal^{1,3}
- does not adhere to the wound³

Suprasorb® P sensitive Ag NEW

Broad antibacterial action for all moderate to highly-exuding wounds.

border
with super-absorbent core

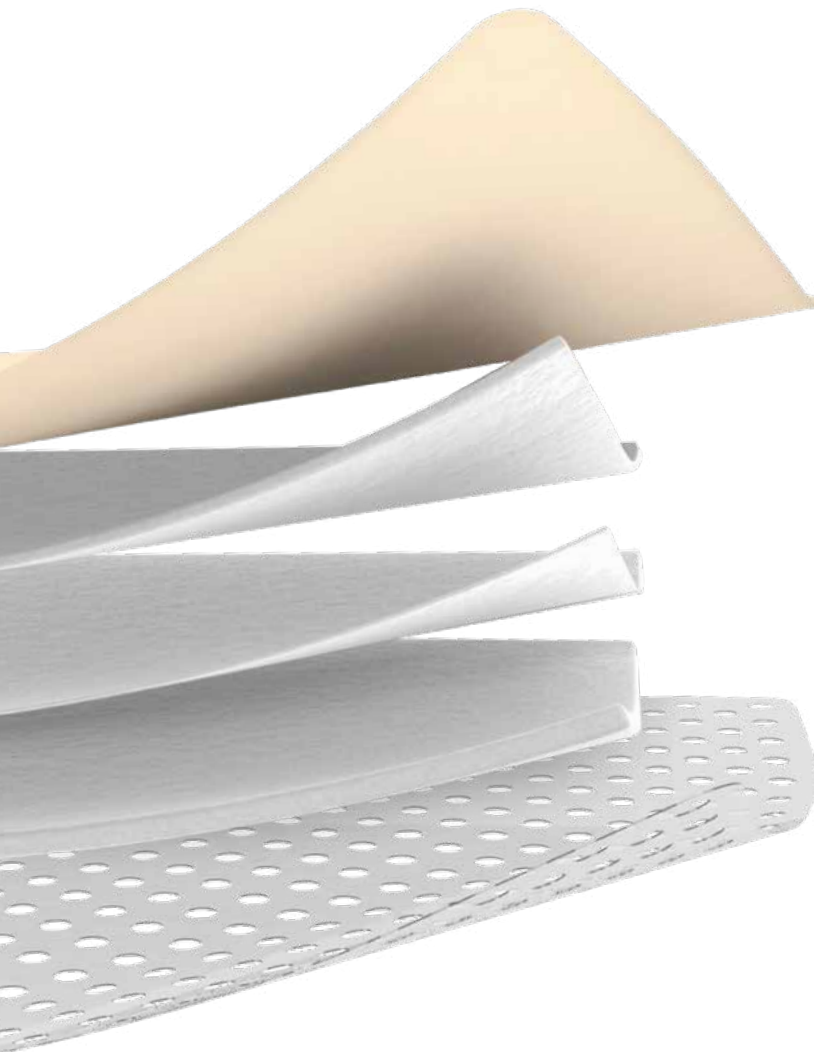

for moderately to heavily exuding wounds

non-border
without super-absorbent core

for moderately exuding wounds

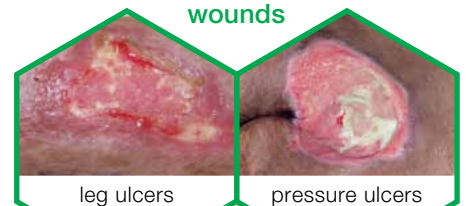

Suprasorb® P sensitive Ag border

Indications

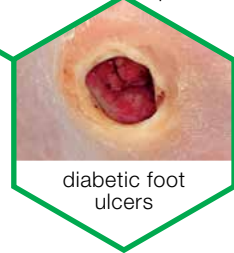

For the management of acute and chronic wounds such as[®]:

chronic wounds

leg ulcers

pressure ulcers

diabetic foot ulcers

skin abrasions

skin tears

wound dehiscence

skin graft donor & transplant sites

surgical staples / sutures

minimally invasive surgery

traumatic wounds

surgical wounds
