Unique Mode of Action
- Lifts, binds, and removes slough and debris, including biofilm

See the Debrisoft® Difference through clinical outcomes.

Wound clinic: Venous insufficiency ulcer and dermatitis with residue and hyperkeratotic scales in periwound area. Debrisoft® was first used to cleanse and de-scale periwound area before addressing the wound.

Venous leg ulcer w/hyperkeratotic scales in the periwound area

BEFORE

AFTER

Pressure injury

BEFORE

AFTER

Mixed leg ulcer

BEFORE

AFTER

Debrisoft® was first used to remove the dense fibrinous membrane from the outer wound bed. Next sharp debridement was used to remove the eschar in the center of the wound bed. Finally, Debrisoft was again utilized to remove the remaining necrotic remnants.
