Fluid Management Packs
(boxes of 5 dressings)

Quick reference guide

possiblewithpico.com
PICO° 7
Fluid Management Packs

Flexibility that makes a difference
Fluid Management Packs of 5 dressings now available to order
- ALL 10 dressing sizes included: (10x20cm, 10x30cm, 10x40cm, 15x15cm, 15x20cm, 15x30cm, 20x20cm, 25x25cm, small multisite, large multisite)
- Provides the flexibility to tailor therapy to patients clinical needs
- Minimizes waste and optimizes dressing utilization

PICO dressing with AIRLOCK° Technology is constructed from four layers

1 A high moisture vapor transmission rate (MVTR) upper film
   Based on the IV3000° technology, the top layer aids in the moisture evaporation of fluid while providing a bacterial barrier.1

2 Upper super-absorbent layer
   Composed of super absorbent materials to help keep the exudate locked away from the wound.2

3 Low airlock layer
   This pioneering AIRLOCK Technology cleverly enables an even distribution of negative pressure across the wound while also enabling the movement of exudate to pass through the dressing.3

4 Silicone adhesive perforated contact layer
   Allows transmission of negative pressure to the wound bed and reduces pain to the periwound area on dressing removal.4
**PICO™ indications**

For patients who would benefit from a suction device (NPWT) as it may promote wound healing via removal of low to moderate exudate and infectious materials. Appropriate wound types include:

- chronic wounds
- acute wounds
- traumatic wounds
- sub-acute and dehisced wounds
- partial thickness burns
- ulcers (such as diabetic or pressure)
- flaps and grafts
- closed surgical incisions

**PICO fillers and wound contact layers**

PICO is compatible with standard NPWT gauze and foam where this is clinically appropriate – for example on a cavity wound. When a filler is used, the filler and the PICO dressing should be changed 2 to 3 times a week, according to local clinical protocol and manufacturers instructions.

PICO may be used over the top of a non adherent layer if required, for example over a skin graft.

On infected wounds or wounds at risk of infection, the PICO system is compatible with ACTICOAT® Flex 3 and ACTICOAT Flex 7 Nanocrystalline Silver dressing.\(^\text{15}\)

---

**Application guide**

1. Clean and prepare wound according to local protocol.

   **Dress**

   2. Peel off the first release handle and place the dressing centrally over the wound. The port should be uppermost from the wound.
   3. Remove the other two handles and smooth the dressing around the wound to prevent creasing.

   **Press**

   4. Insert the batteries into the device.
   5. Join the device to the dressing by twisting together the tubing connectors.
   6. Press the orange button to start the application of negative pressure. The green light will start to flash (indicates system working OK).

   **Go**

   7. Apply the fixation strips to each of the four sides of the dressing.
   8. The device has a 7 day life and the dressing may be left in place for up to 7 days depending on the level of exudate.
   9. When a filler is used, the filler and the PICO dressing should be changed 2 to 3 times a week.\(^\text{††}\)

**Dressing change indicator**

- **A** Dressing properly positioned and is acceptable to be left in place
- **B** Dressing requires change – port may block with fluid
- **C** Dressing requires change – absorbent area is full

The dressings should only be applied by a healthcare professional.

* 2 x dressing kit = 2 dressings + 1 pump; ** 1 x dressing kit = 1 dressing + 1 pump; *** Fluid Management Packs = 5 dressings only

**PRECAUTION:** Where PICO is used on infected wounds, more frequent dressing changes may be required. Regular monitoring of the wound should be maintained to check for signs of infection.

**PRECAUTION:** The use of negative pressure presents a risk of tissue ingrowth into foam when this is used as a wound filler. When using a foam filler with PICO, tissue ingrowth may be reduced by using a non-adherent wound contact layer or by increasing the frequency of dressing changes.

For detailed product information, including indications for use, contraindications, effects, precautions, warnings, and important safety information, please always consult product’s Instructions for Use (IFU) prior to use.
