Our Wound Management System is a powerful hardware and software solution for wound measurement, documentation and management allowing you to redefine wound care.

HOW DOES IT WORK?

Use our WoundZoom 3D tablet to obtain accurate wound measurements while completing your documentation in our WoundZoom App. Data is transmitted wirelessly to our web based software WoundZoom Web. Revise and review your documentation within WoundZoom Web, creating custom reports to show wound healing, treatment effectiveness and wound types.

Let our Wound Management System provide you with the tools to work more efficiently and provide better patient outcomes.

WHAT ELSE MAKES IT DIFFERENT?

- Lowest Cost, Complete Solution
- Advanced Reporting
- Tissue Analysis
- HL7, Seamless EHR Integration
- Track Healing
- Single-Source, Full Service System
- HIPAA & HITECH Compliant
- Encrypted Data (At-Rest & Transmission)
- Comprehensive Documentation
- Work Offsite with Briefcasing
